### ABOUT THE INSTITUTE

Institute established in 2008 under Shanti Education society with revolutionary ideas and ample innovativeness to Technology in Solapur region. Institute is approved by AICTE New Delhi & DTE, Mumbai, affiliated to DBATU, Lonere. Institute offers UG programs in Computer, Civil, EnTC and Mech. Engg.

The Campus is sprawling over 15 acres located on the outskirts of Solapur with beautiful landscapes, state of art Auditorium, Seminar Halls, Library Computer Centre with internet connectivity, hostel, indoor outdoor Sports facilities, Highly Qualified & Experienced staff, Spacious ventilated & Modern classrooms with latest Teaching aids, Well equipped laboratories with latest equipments and advanced machineries in workshop with CNC Machines, Wi-Fi connectivity, Training for students, CCTV surveillance, Industry institute interaction with Campus placement by reputed companies, Entrepreneurship Cell and Bus Facility.

### INSTITUTE VISION

International Standing in Technical Education and Research, contributing towards Improvement and Empowerment of Society, Country and in turn, Mankind

### INSTITUTE MISSION

- To develop technically sound and globally accepted professionals.
- To enhance capability of updating with cutting edge technologies and innovative research ideas.
- To make aware of social commitments and highest ethical values as inner strength for upliftment of mankind.
- To needcraft career oriented courses and interactive teaching-learning process.

No Registration Fees.

"E-Certificate" will be provided to participants whose Attendance will be above 80%.

### ABOUT FDP

This Faculty Development Program addresses the need to enhance the knowledge about the latest Biomaterials and their Applications in the field of Engineering and Technology. Biomaterials are materials engineered to interact with biological systems for medical and industrial purposes. These materials are pivotal in advancing healthcare, biomedical devices, and other interdisciplinary fields where engineering meets biology. Biomaterials are substances, natural or synthetic, engineered to interact with biological systems for medical, industrial, or environmental applications. Their unique combination of properties allows them to replace, repair, or augment damaged tissues, organs, or biological functions. Biomaterials like Titanium, Stainless steel, and Magnesium, Ceramics, Polymers & Composites are vital in engineering for their strength, biocompatibility, and corrosion resistance. They are widely used in medical implants, prosthetics, surgical tools, and emerging fields like bioelectronics and tissue engineering. Their versatility drives advancements in healthcare and other engineering domains.

### RESOURCE PERSONS

**Dr. Raviraj M. Kulkarni**

Professor and HOD Chemistry, Coordinator Centre for Nano science & Nano Tech., KLSGIT, Belagavi.

**Prof. S. A. Jeurkar**

SAJ Consultant, Solapur.

**Dr. S. V. Khandal**

Registrar Warana University, Warana Nagar

**Dr. P. Harshada**

Consulting Dentist,  
H&R Dental Clinic, Solapur

**Dr. Arun Y. Patil**

Assistant Director and Associate Professor, Mechanical and Industrial Engineering Department, Manipal Institute of Technology, Bengaluru.

**Dr. Milind Joshi**

Consulting Orthopedician, Sushrut Hospital, Solapur.

### WHO CAN ATTEND

Faculties from Engineering and Polytechnic Institutes  
Approved by AICTE, New Delhi.

## Summary Report of Day: 01

### Inauguration Function

**Inauguration Function Time:** 10.30 to 11.00 am

**Chief Guests:** 1. Dr..M. S. Deshpande (Chairman, IEI, SLC, Solapur)  
2. Dr. Seenappa Venkatappa, (Registrar(Evaluation) Kodagu University, Kushalnagar  
Kodagu Kodagu, Karnataka, India)

The inauguration ceremony commenced with a warm welcome extended to all participants, esteemed guests, faculty members, and experts in the field. It was an honor to have individuals dedicated to advancing education present at the event

The programs host Prof. Mujawar J. S. initiated proceedings by introducing the theme and objectives of the Faculty Development Program. The focus was on the pivotal role of Biomaterials & It's Applications in The Field of Engineering for the dynamic challenges of the future.

The Convenor & Head of the Mechanical Engineering Department Dr.S.B.Gadwal, welcomed a distinguished Chief guest Dr. M.S.Deshpande and Principal of A. G. Patil Institute of Technology, Solapur. Also, briefed about the introduction to the FDP, Dr. V. V.Potdar emphasized the significance of the FDP in fostering a culture of Biomaterials & It's Applications in The Field of Engineering. They highlighted the importance of Biomaterials.

Dr..M. S. Deshpande (Chairman, IEI, Solapur Local Centre , Solapur) has given the information about the Biomaterials & It's Applications in The Field of Engineering for continuous improvement.

Dr. Seenappa Venkatappa (Keynote Speaker) delivered an enlightening address, emphasizing the essence of Biomaterials & It's Applications.

## Summary Report of Day: 01

### Session No.01

**Topic:** Bio and Nanomaterials

**Time:** 11.00am to 12.30 pm

**Speaker:** Dr. Raviraj M. Kulkarni (Dr. Raviraj M. Kulkarni Professor and HOD Chemistry, Coordinator Centre for Nano science & Nano Tech., KLSGIT, Belagavi.)

The introduction of Dr. Raviraj M. Kulkarni was given by Prof.J.S.Mujawar. Dr. Raviraj M. Kulkarni has given the information about Bio and Nanomaterials.

The presentation provides an overview of bio-nanomaterials, focusing on their unique properties, applications, and market trends. It highlights the integration of nanotechnology into fields like medicine, agriculture, cosmetics, and environmental management. Specific examples include 3D bio printing, targeted drug delivery, and Nano sensors for agriculture. The presentation also discusses synthesis methods like sol-gel and chemical vapor deposition, emphasizing nanotechnology's role in advancing research and industry.

### Key Points

1. Applications of Nanotechnology:
  - Used in creating artificial organs, drug delivery systems, self-cleaning surfaces, and air and water purification technologies.
2. Agricultural Advancements:
  - Includes Nano-fertilizers, smart irrigation systems with Nano-hydrogels, and Nano sensors for disease detection in crops.
3. Nanotechnology in Ayurveda:
  - Nano formulations improve bioavailability, stability, and targeted delivery of traditional medicines like curcumin and ashwagandha.
4. Synthesis Techniques:
  - Methods like sol-gel processing and chemical vapor deposition are pivotal in producing high-purity nanomaterials.

### Session No.02

**Topic:** Materials Science of Biomaterials.

**Time:** 01.30 to 03.00 pm

**Speaker:** Prof. S. A. Jeurkar (SAJ Consultant, Solapur)

The introduction of Prof. S. A. Jeurkar was given by Prof.J.S.Mujawar. Prof. S. A. Jeurkar sir has thoroughly explained about the Materials Science of Biomaterials.

The presentation explores biomaterials, their types, properties, and applications in medical fields such as implants, drug delivery, and tissue engineering. It emphasizes the importance of biocompatibility, biodegradability, and resistance to corrosion in biomaterials used for repairing and regenerating biological systems.

## Summary Report of Day: 02

### Session No.01

**Topic:** Sustainability in Biomaterials Engineering

**Time:** 11.00 am to 12.30 pm

**Speaker:** Dr. S. V. Khandal (Registrar Warana University Warana Nagar)

The introduction of Dr. S. V. Khandal was given by Prof.J.S.Mujawar. Dr. S. V. Khandal has given the information about Sustainability in Biomaterials Engineering.

The presentation highlights the integration of sustainability in biomaterials engineering, emphasizing the importance of sustainable biomaterials derived from renewable resources and ecofriendly processes. It discusses challenges, opportunities, and advancements in additive manufacturing for producing sustainable biomaterials, particularly for biomedical applications like implants, tissue engineering, and drug delivery systems.

#### 1. Sustainability and Circular Economy:

- Focus on minimizing waste, recycling materials, and promoting environmentally friendly processes in biomaterials engineering.

#### 2. Types of Biomaterials:

- Includes natural and synthetic biomaterials like polymers, metals, and ceramics, with applications in medical devices and regenerative medicine.

#### 3. Additive Manufacturing (AM):

- AM enables the creation of intricate, patient-specific biomedical solutions, using biopolymers and metals for implants and drug delivery systems.

#### 4. Challenges and Innovations:

- Regulatory compliance, climate change mitigation, and cross-sector collaborations are key areas for advancing sustainable biomaterials.

### Session No.02

**Topic:** Biomaterials in Medical Applications (Dental Applications)

**Time:** 01.30 to 03.00 pm

**Speaker:** Dr. P Harshada (Consulting Dentist, H&R Dental Clinic, Solapur)

The introduction of Dr. P Harshada was given by Prof.J.S.Mujawar. Dr. P Harshada explained about Biomaterials play a crucial role in dental applications by providing biocompatible, durable, and functional materials for various treatments and restorations.

Commonly used biomaterials in dentistry include ceramics, polymers, and metals, which are employed in dental implants, crowns, bridges, and fillings. Titanium and its alloys are widely used for dental implants due to their excellent Osseo integration properties, promoting strong bonds with jawbone tissues.

Polymers like polymethacrylate (PMMA) are utilized in dentures and temporary restorations, while ceramics such as zirconia and alumina are preferred for their aesthetic appeal and high strength in crowns and veneers. Advances in biomaterials have also enabled the development of bioactive materials, such as calcium phosphate-based cements, that promote tissue regeneration and repair, enhancing the overall success and longevity of dental treatments.

## Summary Report of Day: 03

### Session No.01

**Topic:** Biomaterials in Structural Engineering Applications.

**Time:** 10.30 am to 12.00 pm

**Speaker:** Dr. Arun Y. Patil (Assistant Director and Associate Professor, Mechanical and Industrial Engineering Department, Manipal Institute of Technology, Bengaluru)

The introduction of Dr. Arun Y. Patil was given by Prof. D.A.Jhaveri. Dr. Arun Y. Patil sir explained about Biomaterials are increasingly being explored in structural engineering applications for their sustainable, durable, and environmentally friendly properties.

These materials, derived from natural or synthetic sources, are utilized in creating bio-composites, bio-cement, and other construction materials. For instance, bio-based polymers and cellulose fibers are used to produce lightweight, high strength composites for structural reinforcement. Innovations like bacterial concrete, which incorporates microorganisms to heal cracks, enhance the durability and longevity of structures.

Additionally, biodegradable and recyclable biomaterials reduce construction waste and environmental impact, aligning with the principles of green and sustainable building practices. These advancements are revolutionizing the industry by providing efficient and eco-conscious solutions for modern infrastructure needs.

### Session No.02

**Topic:** Biomaterials in Orthopaedics

**Time:** 12.00pm to 01.00 pm

**Speaker:** Dr. Milind Joshi (Consulting Orthopedican, Sushrut Hospital, Solapur)

The introduction of Dr. Milind Joshi was given by Prof. D.A.Jhaveri. Dr. Milind Joshi sir explained about Biomaterials are essential in orthopedics for repairing, replacing, and supporting damaged or diseased bones, joints, and soft tissues. Commonly used biomaterials include metals like titanium and stainless steel for implants such as joint replacements, bone screws, and plates, offering excellent strength and biocompatibility.

Polymers like ultra-high molecular weight polyethylene (UHMWPE) are employed in joint bearings for their wear resistance. Additionally, bioactive ceramics, such as hydroxyapatite, are used for bone grafts and coatings to enhance Osseo integration. Innovations in biomaterials, such as biodegradable polymers and composite materials, enable better tissue regeneration, reduce long-term complications, and improve the overall outcomes of orthopedic treatments.

## Summary Report of Day: 03

### Session No.03

**Topic:** Nanotechnology in Biomaterials

**Time:** 01.30pm to 03.00 pm

**Speaker:** Prof. S. A. Jeurkar (SAJ Consultant, Solapur)

The introduction of Prof. S. A. Jeurkar was given by Prof. D.A.Jhaveri. Prof. S. A. Jeurkar sir explained about Nanotechnology in biomaterials has revolutionized the field of medicine by enabling the development of materials with enhanced properties at the nanoscale. By manipulating materials at the molecular level, nanotechnology improves biocompatibility, mechanical strength, and bioactivity of biomaterials.

Nanostructured materials, such as nanoparticles and nanotubes, are used in drug delivery systems, promoting targeted and sustained release of therapeutics. In tissue engineering, nanofibers and hydrogels mimic the extracellular matrix, facilitating cell growth and tissue regeneration.

Additionally, Nano coatings on implants enhance Osseo integration and reduce infection risks. This integration of nanotechnology with biomaterials paves the way for advanced treatments in regenerative medicine, orthopedics, and beyond.

**Collaborative Research**

Eg: Project of Bio-nanotechnology using 3D Printing / Bio Printing

- **Mechanical, nanotechnology, Chemistry, Biotechnology, computer science, economics, and sociology.**
- **Multi-disciplinary Research:** Involves the collaboration of researchers from different disciplines who work independently in their own fields to address a common research problem. No integration of methodologies.
- **Cross-disciplinary Research:** The collaboration involves sharing ideas and methodologies to create a more comprehensive approach.
- **Inter-disciplinary Research:** Involves the collaboration of researchers from different disciplines who actively integrate their approaches to develop a comprehensive understanding of a complex issue.
- **Trans-disciplinary Research:** Additionally, it involves collaboration with policymakers and local communities to ensure that the project addresses the real-world needs and concerns of the people who live in the city.

**Dr. Raviraj M. Kulkarni**

**Professor and HOD Chemistry, Coordinator Centre for Nano science & Nano Tech., KLSGIT, Belagavi.**

**Metallic Biomaterials: Ti Alloys**

Labels: Crown, Bridge, Clasp, Denture Base (CP-Ti, Ti-44Al-7Nb)

Orthodontic Wire (Ti-Ni, Ti-Mo)

Elbow Joint (Ti-44Al-4V, Ti-44Al-7Nb, Ti-15Mo-5Zr-3Al, Ti-44Al-7Nb-Ti-6Al-8Mo)

Hip Joint & Femur (Ti-44Al-4V, Ti-44Al-7Nb, Ti-15Mo-5Zr-3Al, Ti-44Al-7Nb-Ti-6Al-8Mo)

Dental Implants (CP-Ti, Ti-44Al-4V, Ti-44Al-7Nb)

Shoulder Joint (Ti-44Al-4V, Ti-44Al-7Nb, Ti-15Mo-5Zr-3Al, Ti-44Al-7Nb-Ti-6Al-8Mo)

Spinal Spacers (Ti-44Al-4V, Ti-44Al-7Nb)

Knee Joint (Ti-44Al-4V, Ti-44Al-7Nb, Ti-15Mo-5Zr-3Al, Ti-44Al-7Nb-Ti-6Al-8Mo)

Due to the excellent mechanical tribological properties, corrosion resistance, biocompatibility, and antibacterial properties of titanium, it is getting much attention as a biomaterial for implants. Furthermore, titanium promotes integration without any additional adhesives by physically bonding with the living bone at the implant site. These properties are crucial for producing high-strength metallic alloys for biomedical applications.

**SUSTAINABLE BIOMATERIALS**

A sustainable biomaterial should have desirable and durable material characteristics, and the environmental impact of the entire production process, from the production through processing, degradation, recycling, or ultimate disposal at the end of its useful lifespan

**Sustainable biomaterial** is a material that is -

- Sourced from sustainably grown renewable resources
- Produced using environmentally friendly manufacturing processes
- Safe and non-hazardous for the environment
- Reused and recycled at the end of their intended use, such as feedstock for another process or via recycling or composting
